

CEN-PE-CO STEAM CYLINDER OIL

Cen-Pe-Co Steam Cylinder Oil is a compounded oil designed specifically for steam engines. Most cylinder oils have little (3%) or no tallow because they are recommended for gear boxes where emulsification with water is undesirable. Cen-Pe-Co Steam Cylinder Oil is recommended only for steam cylinders. Since it is not a compromise between two different applications, Cen-Pe-Co Steam Cylinder Oil provides the superior performance that only comes from a dedicated product.

Cen-Pe-Co Steam Cylinder Oil is formulated with 100% virgin Pure Paraffin Base Bright Stock and a high concentration of Acidless Tallow Oil (10%). Additives include a passive Extreme Pressure additive (synthetic sperm oil), lubricity enhancers, and rust inhibitors.

Cen-Pe-Co Steam Cylinder Oil emulsifies with water and steam. It provides superior lubrication on wet surfaces and holds on tenaciously to resist the washing effect of moisture. This product is designed for pressures of 75 to 175 PSI and temperatures up to 400°F. However, due to the heat resistance of its 100% Pure Paraffin Base Oil and highly refined Acidless Tallow Oil, it does not leave deposits at higher pressure and temperature levels like other cylinder oils (particularly those made with lard oil).

Since steam engines today spend most of their time in storage, Cen-Pe-Co Steam Cylinder Oil contains a special rust inhibitor to protect the surfaces from rust during storage. This is the same rust inhibitor used to protect U.S. Military vehicles for up to 3 years of storage (Mil-L-21260).

CONTAINERS:

- 5 Gallon Pail
- 2 Gallon Jug (4 per case)
- 1 Gallon Bottle

TYPICAL CHARACTERISTICS:

Viscosity			
cSt	@	40°C	316
cSt	@	100°C	25.6
SUS	@	100°F	1674
SUS	@	210°F	127
Viscosity Index			105
Acidless Tallow Oil Content			10%
